Next Attraction
Another Big Feature Play, "THE THIRD DEGREE"

JAPS AND WHITE MEN DIFFER IN THEIR EVIDENCE

Both sides of the international dispute that occurred Friday evening were given opportunities to tell their stories in police court this morning and the stories told by the Americans differed from that related by the Jap. Special Officer Horspool told of what he saw and that contradicted the chain of incidents related by the construction men. Judge W. H. Reeder took the case under advisement until Monday.

Theodore Syphers, the man charged with assaulting the Jap, K. Shiba, said that as he was about to go home from a party of friends he accidentally stepped in front of Shiba but that he apologized and in return was kicked on the ankle. A fight resulted in which he received a bite on the ear. Three friends bore him out.

ATHENIAN OATH FOR THE SCHOOLS OF THIS CITY

General assemblies will be held in all the city schools during next week when the framed copies of the ancient Athenian oath will be formally presented to the schools with appropriate ceremonies. Judge A. R. Heywood presented to the board of education thirteen copies of the oath for distribution to the various schools. The copies arrived this morning and each of the schools, with the exception of the high, will receive one on Monday. One copy has been presented to the high school.

CLEARING THE SITE OF THE D. & R. G. BUILDING

Preliminary work on the Denver & Rio Grande freight station, being constructed near 24th street and Wall avenue, is now well along. Men have been constructing concrete forms and a number are at work today building a 60-foot concrete tower, while much of the excavation has been completed. Orders for the steel to be used were sent out several days ago and the first shipment is expected to arrive in a week. Before the arrival of the steel the concrete foundation and much of the other work will be under way.

DANCE TONIGHT Five Points Dance Hall

Over the Drug Store, 9 P. M. LADIES FREE

the other machinery necessary in the construction of the building arrived last night from other jobs of the company and men worked during the day unloading the heavy apparatus from the flat cars that had been sidetracked on the spur within a few feet of the building site.

GREGG SHORTHAND

We believe the people of Ogden should have the latest and best in commercial education. That's why we teach Gregg Shorthand and modern accountancy at the Central Business College, Opposite P. O. Day and Night school.

TWIN BABIES IN A CARRIAGE BUILT FOR TWO

Although passenger directors in the Union depot, because of their position, are apt to belong to the class that declares there is nothing new under the sun, some of them, including Depot Master John Shields and his assistants have changed their minds since yesterday afternoon. The object that caused the change was a twin-baby carrier, designed by a Chicago man who is traveling to San Francisco with his family from Chicago.

CHURCHES

Reorganized Church of Jesus Christ of Latter-day Saints—Fifteenth street and Washington avenue. J. E. Vandervoort, pastor. Sunday school at 10 a. m. Preaching at 11 a. m. and 7:30 p. m. YELLOWSTONE PARK LAST TRAIN TODAY

The last train for Yellowstone park will leave Ogden this evening and the last train from the park will arrive on September 22. The train which goes north today will bring all employees from the various hotels and the park will be left with only those few caretakers who remain through the winter.

Eldreds electric merry-go-round, located on Hudson avenue, will be here tonight.

AZORES ON THE NEUTRAL ZONE

London, Sept. 20.—A proposal to make the Azores archipelago an international neutral zone is being considered by the American, British and German governments according to today's Manchester Guardian. The proposal is said to be incidental to the opening of the Panama canal.

The fact that German, American and British companies have a joint station on the islands makes free access to them of the utmost importance. "It is proposed," says the Guardian, "that a joint treaty be arranged between Portugal and the other civilized nations by which a neutral international zone shall be established and strictly maintained in the archipelago. It is suggested that all vessels within this zone be protected against attack or seizure and allowed to receive provisions and fuel."

WOODMEN OF WORLD HAVE TWO DAYS FESTIVITIES

With a grand ball attended by 600 persons, the two-day housewarming celebration of the Weber camp, Woodmen of the World, came to an end last night. The two days were given over to receptions and merry-making in honor of the occupation of the new quarters in Fraternity block. The affair was a complete success, 2000 people having visited the lodge rooms. A campaign to increase the lodge membership from 750 to 1000 by January 1 was launched. Every member is considering himself a committee of one to secure new members for initiation.

The ball last night was enjoyed by all. There were 21 dances on the program and almost every one of the 374 couples danced every number because the floor was ideal and the music furnished by the Woodmen orchestra could not have been better.

ALIMONY QUARREL IS AIDED BEFORE COURT

Salt Lake, Sept. 20.—A quarrel over alimony occupied most of the afternoon at the regular divorce matinee before Judge C. W. Morse yesterday. Ellen Taylor Stewardson had her ex-husband, Thomas Stewardson, cited to show cause why he should not keep an alleged agreement and pay her \$500.

WALTER P. MONSON'S SURPRISED BY FRIENDS

Walter P. Monson, recently appointed president of the Eastern States mission, to succeed the late Ben E. Rich, was pleasantly surprised at his home, 2521 Van Buren avenue, last evening. Under the auspices of the Weber Stake Sunday school board, of which Mr. Monson is superintendent of the parents' classes, an exceedingly enjoyable party had been planned and it was carried out in a successful manner.

Mr. Monson had been in Idaho for several days and arrived in Ogden last night. Having important business at the office, he remained there after closing hours until a telephone message requested him to come home at once. He hurried. When he stepped into his home a house filled with friends greeted him and the festivities began.

There was an excellent program of songs and instrumental music. Games were enjoyed. As a climax, after the dainty luncheon served by the ladies of the board had been enjoyed, R. H. Goddard, on behalf of the board, presented Mr. Monson with a splendid handbag. To the speech of presentation the recipient responded in an able manner.

The party was given in the nature of a farewell, as Mr. Monson leaves October 8 for New York to take up his duties as president of the Eastern States mission of the Mormon church. Among those present at the surprise were:

Mr. and Mrs. B. H. Goddard, Mr. and Mrs. Jos. S. Campbell, Mr. and Mrs. W. H. Petty, Mr. and Mrs. John M. Bernards, Mr. and Mrs. George Ensign, Mr. and Mrs. Burdette Smith, Mr. and Mrs. W. H. Israelson, W. M. Hawkins, Dewey R. Ensign, John T. Mumford, Lester Hinchcliff, Walter Monson, Jr., Mrs. C. C. Brown, Mrs. S. R. Parkinson, Miss Lola Farrell, Miss Rhoda M. Stitt, Miss Marian Parkinson, Miss Eva Hetzler, Miss Nellie Herrick, Miss Etta Halverson, Miss Ellen H. Thomas, Miss Clara Brown, Miss Virgie Steel, Miss Verna Monson, Miss Lillian H. Thomas.

CHRISTIAN SCIENCE IN REPLY TO AN OGDEN DOCTOR

Editor Standard: It is to be regretted that Dr. Anna Ries-Finley, in her able article on medical statistics published in your issue of the sixteenth, should have made allegations against Christian Science. It is very evident she did so under a misapprehension of the question. In passing let me say that the trial of Benjamin Jewell resulted in the jury under the instruction of the judge finding the defendant not guilty. In fact the judge stopped the case on the ground that it would clearly be too dangerous to convict a man of neglect on the evidence adduced by the prosecution and there was therefore no neglect and no cause for action.

The time-worn argument that Christian Science is a misnomer has been refuted long since, but for the benefit of your readers it may be well to remind them of the meaning of those terms. The word Christian, according to the Standard dictionary, is "one who has faith in Christ or (and) his teaching." The definition of science given by the same authority is "knowledge, reducing to a system." Science, according to Huxley, is the answer man makes to the question, "What do I know?" Then Christian Science may truthfully be said to be the answer to the question, "What does man know of faith in Christ and his teaching concerning God, man and the universe?" Reduced to a system and practiced according to rules, conforming to that teaching, Mrs. Mary Baker Eddy, the discoverer and founder of Christian Science, and the author of its textbook, Science and Health with Key to the Scriptures, writes on pages 342 and 343 of that work: "If Christianity is not scientific, and Science is not of God, then there is no invariable law, and truth becomes an accident. Shall it be denied that a system which works according to the Scriptures has Scriptural authority? If Christian Scientists were teaching or practicing pharmacy or osteopathy according to the common theories, no denunciations would follow them, even if their treatment resulted in the death of a patient. The people are taught in such cases to say, 'Amn. Shall I then be smitten for healing and teaching truth as the principle of healing, and for proving my word by my deed?' James said: 'Show me thy faith without thy works, and I will show thee my faith by my works.'"

The efforts of Christian Scientists to understand the laws of God and live according to those laws surely cannot be said to be getting into deep water, nor is the destruction of disease, whether so-called deadly or otherwise, by the application of their understanding of those divine laws in any sense playing with disease. Christian Scientists do not play with disease. They grapple with it and with the help of God and the applied understanding of Him, they destroy it.

The writer has no quarrel with medical practitioners. On the contrary, he admires their earnest, honest conscientiousness and oftentimes consecrated efforts to alleviate human suffering. He has nothing to say about the merits or demerits of any system or other medical theories, other than that their application must be left to the judgment and faith of those who follow that system whether they be practitioners or patients. The point his former communication intended to make was that it is an occasional successful attempt of Christian Science to effect a cure should be classed as a failure and heralded broadcast, why should not unsuccessful attempts of materia medica (of which, with one exception, every newspaper in the country bears daily witness) also be classed as medical failures and given equal publicity? If one is a failure, why are not the others? It is simply a point of common justice, Mr. Editor. Why is it so much said about the alleged achievements of materia medica, while its failures, or unsuccessful efforts if our critics prefer that expression, are accepted as dispensations of Providence and ignored? The writer is inclined to agree with our critic that the sin of omission is one which all should guard against. It would appear, however, that our views as to what is omission do not agree. Christian Scientists feel that it is more grievously wrong to omit to trust God in every instance, than it is to trust His infinite power in one instance and rely upon a lower power in another. When Jesus the Master physician and metaphysician told his disciples that "with God all things are possible," he did not say anything about dry or any other kind of powder, nor did he say except certain diseases which mortals call "incurable." Rather did he teach "I give you power over all the power of the enemy, and nothing shall by any means hurt you." Surely this means power over all kinds of evil, "curable" and "incurable" diseases included. Christian Scientists are not, then, guilty of the sin of omission or commission when they are using their every endeavor to know God and understandingly apply His laws on any and every occasion. This they do by humble, earnest prayer—prayer without ceasing—such prayer as is described in the opening words of the Christian Science textbook: "The prayer that reforms the sinner and heals the sick is an absolute faith that all things are possible to God—a spiritual understanding of Him, an unselfed love." (Ibid. page 1.) Very respectfully, (Signed) Warwick A. Taylor, Christian Science Committee on Publication for State of Utah.

WELL DRESSED PEOPLE WILL MAKE THE FASHION SHOW A SUCCESS ARE YOU READY?

Our mission is to prepare you for the event, even though you do not have the money now to purchase your new Fall Outfit.

The National dignified credit system comes to your assistance, and you may have the newest, latest and most fashionable Fall costumes, with small payments each week or month.

By doing so you find out the merits of our merchandise before it is paid for, so you see we have to sell you better clothes than any other store.

Credit customers pay the same at this store as cash customers. We guarantee more values at lower prices than any store in town.

Next week only, we offer you new Fall Suits, Coats and Dresses; values up to \$25.00 at \$19.95

These garments come in all the latest styles and in all the new shades, and materials.

The new Fall Millinery will be on sale next week; values up to \$10.50, at \$5.95

We dress the men as well as the ladies, on our dignified credit plan. Our new line of Shoes, Hats, Suits and Furnishings is complete. We invite your inspection.

THE NATIONAL
2345 Washington Ave.

Salt Lake City, Utah, September 19, 1913.

FOREST FUNDS ARE ALLOTTED TO STATE

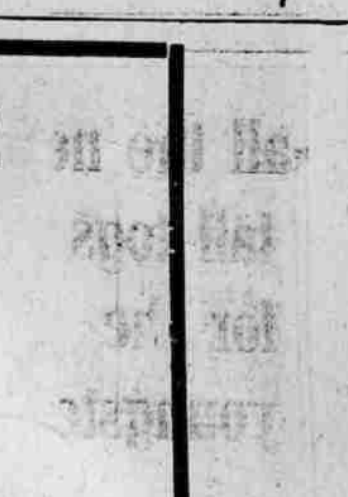

Notification that Utah's share of the revenues from the national forests within its boundaries for the year ending last June 30, amounts to \$34,902.14 was received by Governor Spry yesterday from the department of the interior at Washington.

The money goes to the various counties of the state in proportion to the area of forest land within each county. Under a federal law 25 per cent of the receipts from the forest lands goes to the state in which the forests are located. The money must be spent for improvements of roads or for school purposes.

Following is the distribution of the fund among the various reserves: Ashlet reserve, \$2133.14; Cache reserve, \$1961.48; Fillmore, \$2392.38; Fishlake, \$2066.79; LaSal, \$2265.62; Mant, \$7430.52; Minidoka, \$464.71; Nebo, \$1296.23; Pocatello, \$68.72; Powell, \$2676.43; Sevier, \$3629.54; Uintah, \$5733.90; Wasatch, \$1054.15. Salt Lake county receives \$1054.15, inasmuch as it contains practically all of the Wasatch reserve.

PROVO HIGH SCHOOL GIRLS DON UNIFORMS

Provo, Sept. 19.—Dance fashion has been ousted, in fact bodily thrown out of the Provo high school by the girls students and no longer do they have day dreams of "new creations," to "put one over" on the other girl, for uniforms have been adopted by unanim-

ous consent of the female student body. Last year the girls decided to adopt a uniform dress and at that time there were some dissenting votes against it. But the majority prevailed and a uniform dress of blue serge was donned by the girls. Yesterday a vote was taken as to whether the uniform would prevail again this year and there was not one dissenting vote. The teachers too have taken on the spirit and wear the same uniform dress as the girls.

The dresses are of blue serge and plainly made. Some of the girls add simple trimmings of red or white braid but for the most part the dresses are without the added frills. The same idea has been carried out in their graduation dresses and the elaborate dresses of a few and the simpler ones of others, which in years gone by, have caused many heart aches, are gone, for the girls have held themselves to only simple and inexpensive gowns for their graduation.

Cravath seems destined to win home run honors for the year, as he now has 18. Ludorus of Philadelphia has 15, and Sater of Chicago has 13. Carey of Pittsburgh has taken away the base stealing lead from Myers of Boston, having 49 to the latter's 42.

Jim Vaughn's first defeat of the season came too late to be recorded in this week's averages and he leads the National's pitchers. The first five are:

	Won	Lost	Pct.
Vaughn, Chicago	4	0	1000
Demaree, New York	15	3	833
Humphries, Chicago	14	3	824
Cooper, Pittsburgh	6	2	750
Luhren, Pittsburgh	3	1	750

SOPHOMORE KILLED DURING 'TANKSCRAP'

Lafayette, Ind., Sept. 20.—F. W. Obenchain of South Whitley, Ind., died last night during the annual "tankscrap" between the freshmen and sophomore classes at Purdue university. Obenchain, a sophomore, and his classmates wore leather collars, reinforced with metal, to protect their necks. The dead student had a gash of the neck and in the excitement his neck swelled until he was choked to death.

Physicians said Obenchain had been dead 15 minutes when found.

University authorities issued a statement in which it was said Obenchain's death was not due to any injury received in the fight and it was announced that the historic "tankscrap" would never be held again.

The annual freshman-sophomore fight received the name of "tankscrap" because it has been held near a water tank. The freshmen victors last night were parading their victims about the campus and had lighted the bonfire when news of Obenchain's death was announced. The celebration immediately ceased.

NEW DIRIGIBLE MAKES FIRST TRIP

Berlin, Sept. 20.—The new naval Zeppelin dirigible arrived here today, having made her first trip from Friedrichshafen in 11 hours at an average speed of 50 miles an hour against a 16-mile wind.

The dirigible is a sister ship of one which was destroyed in a gale off Helgoland on September 9 when 14 men lost their lives.

A PERFECTLY NATURAL QUERY

Said the friendly city border: To his country host, "I see you have honey on the table. Tell me, do you keep a bee?"—Judge.

THE THREE R'S.

Schuyler—What constitutes "the three R's" in the education of a debutter? Van Puyster—Well, I should say: raiment, ragtime and repartee.—Life.
